Seasonally Adjusted

The Bureau of the Census, Department of Commerce, announced today that during September 1980, exports on a f.a.s (free alongside ship) U.S. port of exportation value basis, excluding Department of Defense (DOD) Military Assistance Program Grant-Aid shipments, amounted to $18,701.0 million and that general imports on an f.a.s. foreign port of exportation value basis, amounted to $19,465.0 million.[1 2 3]

Based on the above export and import figures, the September merchandise trade balance was in deficit by $764.0 million.[1 2 3]

During the first 9 months of 1980 (January-September), exports were at an annual rate of $218,376 million, a level about 20 percent higher than the calendar year 1979 total of $181,637 million. Imports for the January-September 1980 period were at an annual rate of $240,603 million, an increase of about 17 percent over the calendar year 1979 total of $206,327 million.

For the 4-month period, June-September 1980, exports averaged $18,630.3 million per month, about 4 percent higher than the $17,978.4 million average reported for the preceding 4-month period, February-May 1980. Imports on an f.a.s. value basis, averaged $19,397.3 million per month for the current 4-month period, a level about 5 percent below the $20,481.4 million average reported for the preceding 4-month period.[1 2 3]

Unadjusted

Exports excluding Military Assistance Program Grant-Aid shipments decreased from $17,938.4 million in August to $17,800.9 million in September. General imports increased from $18,858.8 million in August to $19,078.7 million in September.

# EXPLANATION OF STATISTICS

### Coverage

The U.S. foreign trade statistics include, in general, both government and nongovernment shipments of merchandise and reflect the physical movement of foreign trade shipments into and out of the U.S. Customs territory (includes the 50 States, the District of Columbia, and Puerto Rico), with certain exceptions. The statistics exclude data on shipments between the United States, Puerto Rico, and U.S. possessions, between U.S. possessions and foreign countries, shipments to U.S. Armed Forces and diplomatic missions abroad for their own use and American goods returned to the United States by its Armed Forces, intransit shipments, etc. (See paragraph below regarding sources of further information.)

Users of the statistics are advised that cumulations of data over at least 4-month periods are desirable to identify underlying trends. Month-to-month changes in imports, exports, and similar series often reflect primarily irregular movements, differences in monthly carryover, etc.

### Valuation of Imports

**C.i.f. Import Value.**—The c.i.f. (cost, insurance, and freight) value represents the value of imports at the first port of entry in the United States. It is based on the purchase price and includes all freight, insurance, and other charges (excluding U.S. import duties) incurred in bringing the merchandise from the country of exportation and generally placing it alongside the carrier at the first port of entry in the United States. If the merchandise was acquired in a transaction between related parties, the purchase price used in deriving the c.i.f. value is based on an arm's-length equivalent transaction price, i.e., a price which would exist between unrelated buyers and sellers.

**F.a.s. Import Value.**—The f.a.s. (free alongside ship) value represents the transaction value of imports at the foreign port of exportation. It is based on the purchase price, i.e., the actual transaction value and generally includes all charges incurred in placing the merchandise alongside the carrier at the port of exportation in the country of exportation.

### Valuation of Exports

**F.a.s. Export Value.**—The value reported in the export statistics generally is equivalent to an f.a.s. (free alongside ship) value at the U.S. port of export, based on the transaction price, including inland freight, insurance and other charges incurred in placing the merchandise alongside the carrier at the U.S. port of exportation.

## SOURCES OF FURTHER INFORMATION

Additional foreign trade statistics and information regarding coverage, valuation, sampling, and qualifications which should be considered by users of the statistics are contained primarily in the following publications: Report FT990, Highlights of U.S. Export and Import Trade; FT 135, U.S. General Imports, Schedule A Commodity by Country; FT 410, U.S. Exports, Schedule E Commodity by Country; and the Guide to Foreign Trade Statistics. Information regarding additional sources of statistics, the methodology used in seasonally adjusting the data, and other matters relating to foreign trade statistics may be obtained from the Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233.

[r]Revised effective with September 1980 statistics.

[1]Exports represent shipments of domestic and foreign merchandise combined, excluding Department of Defense (DOD) Military Assistance Program Grant-Aid shipments on an f.a.s. (free alongside ship) U.S. port of exportation value basis. General imports represent shipments of merchandise on a c.i.f. (cost insurance, and freight) U.S. port of entry value basis and on an f.a.s. (free alongside ship) foreign port of exportation value basis.

[2]The totals shown in this table, are derived by adding the seasonally adjusted commodity components as shown in table 3 for exports and tables 4 and 5 for imports.

[3]Percentage change from same period in previous year.

[1]Export and import statistical series are adjusted for seasonal and working-day variation but not for changes in price level. Reflecting a new methodology, introduced with statistics for January 1979, the adjusted monthly export and import totals for 1979 and 1980 presented in this report are derived by adding the seasonally adjusted components (i.e. SITC sections). The factors used to adjust the 1979-1980 component series represent the combination of seasonal adjustment factors developed from monthly data through 1979 and the appropriate working-day factors. Prior to January 1979, monthly totals were adjusted independently of the components.

[2]Cumulations of data over at least 4-month periods are desirable to identify underlying trends. Month-to-month changes in exports, imports, and similar series often reflect primarily irregular movements, differences in monthly carryover, etc. Recent month-to-month percent changes in the overall seasonally adjusted export and import series are presented in the following table with average percent month-to-month rise and decline over longer periods shown for comparison. The averages exclude percentage changes for (1) the period October-December 1977 because of abnormalities in the data due to effects of dock strikes and (2) periods when negligible changes (zero percent) in the level of exports/imports occurred.

TABLE 2. U.S. EXPORTS AND GENERAL IMPORTS OF MERCHANDISE

Selected Export and Import Commodities, Selected Countries, and World Areas

Exports are on an f.a.s. (free alongside ship) U.S. port of exportation value basis. Department of Defense (DOD) Military Assistance Program Grant-Aid shipments are included in the commodity and country totals shown in this table, but excluded from SITC section and over-all export totals shown in other tables of this report. General imports are on a f.a.s. foreign port of exportation value basis. Export and import data are seasonally adjusted unless otherwise noted.

[1]Schedule E section descriptions are as follows: 0. Food and live animals; 1. Beverages and tobacco; 2. Crude materials, inedible, except fuels; 3. Mineral fuels, lubricants, and related material; 4. Oils and fats--animal and vegetable; 5. Chemicals and related products, N.S.P.F.; 6. Manufactured goods classified chiefly by material; 7. Machinery and transport equipment; 8. Miscellaneous manufactured articles, N.S.P.F.; and 9. Commodities and transactions not classified elsewhere.

[2]Adjusted for seasonal and working-day variation using seasonal adjustment factors introduced in January 1980. Adjustment factors have not been applied to data for Schedule E sections 4 and 9 and Foreign (Reexports) due to the absence of identifiable seasonal patterns. The monthly seasonally adjusted export totals presented in table 1 represent the sum of the component totals as shown in this table. Annual totals are not shown for seasonally adjusted data. Unadjusted data should be used for annual totals.

[3]Commodities entering the United States as imports and which at the time of exportation are in substantially the same condition as when imported.

[4]Schedule E sections 0-9 and Foreign (Reexports) combined. DOD Military Assistance Program Grant-Aid shipments are excluded from this total.

[5]Represents only export shipments from the United States and differ from DOD Military Assistance Program Grant-Aid shipment figures under this program as follows: (a) Transfers of the material procured outside the United States and transfers from DOD overseas stocks are excluded from export shipments; (b) Export value is f.a.s., whereas DOD value, in most instances, is f.o.b., point of origin; and (c) Data for shipments reported by the DOD for a given month are included in Bureau of the Census reports in the second month subsequent to the month reported by DOD.

The monthly seasonally adjusted import totals (c.i.f.) presented in table 1 represent the sum of the component totals as shown in this table. Annual totals are not shown for seasonally adjusted data. Unadjusted data should be used for annual totals.

rRevised effective with September 1980 statistics.

[1]Schedule A section descriptions are as follows; 0. Food and live animals; 1. Beverages and tobacco; 2. Crude materials, inedible, except fuels; 3. Mineral fuels, lubricants, and related material; 4. Oils and fats animal and vegetable; 5. Chemicals and related products, N.S.P.F.; 6. Manufactured goods classified chiefly by material. 7. Machinery and transport equipment; 8. Miscellaneous manufactured articles, N.S.P.F.; and 9. Commodities and transactions not classified elsewhere.

[2]Adjusted for seasonal and working-day variation using seasonal adjustment factors introduced in January 1980. Adjustment factors have not been applied to data for Schedule A sections 0, 3, 4, and 9 due to the absence of identifiable seasonal patterns. The monthly seasonally adjusted import totals (f.a.s.) presented in table 1 represent the sum of the component totals as shown in this table. Annual totals are not shown for seasonally adjusted data. Unadjusted data should be used for annual totals.

# GENERAL IMPORTS OF PETROLEUM AND SELECTED PETROLEUM PRODUCTS INTO THE U.S. CUSTOMS AREA AND U.S. VIRGIN ISLANDS, UNADJUSTED

Monthly and cumulative-to-date data on general imports of petroleum and selected petroleum products into the U.S. Customs area and into the U.S. Virgin Islands for the period January 1979 through the current month are presented in the tables that follow. Tables 6 and 7 present imports into the U.S. Customs area and tables 8 and 9 present imports into the U.S. Virgin Islands. (It should be noted that imports into the Virgin Islands are excluded from the regularly compiled foreign trade statistics and, therefore, are excluded from the data presented in tables 6 and 7 as well as the other tables shown in the front of this report.)

The commodity classifications (Schedule A and TSUSA) covering petroleum products, that are effective with January 1980 statistics are reflected in the listing of classifications below and in the tables which follow.
